General Comment

NY already has implemented effective pollution controls and has the cleanest water in the CBW.

The EPA has good intentions at the core although it is going too far and has become overzealous and hurtful to other important aspects of life. I would support a reduction in the influence of the agency if they cannot recognize the forest for the trees.

Is your agency trying to destroy the viability of life in the Great State of New York? There needs to be balance. NY continues to lose residents to states with greater economic viability. We need the economic opportunity provided by the Marcellus shale.

Please incorporate the model revisions recommended by the DEC in their Watershed Implementation Plan.

Thank you for your consideration.
